Preface

Multicriteria Decision Making and Fuzzy Systems are rapidly growing fields of management, engineering and other areas. Bringing together theory and applications, the *German Working Group on Decision Theory and Practice* within the *Gesellschaft für Operations Research (GOR)* organizes a workshop every year. In 2006 the meeting was managed in cooperation with the *German Working Group on Fuzzy Systems, Neural Networks and Artificial Intelligence*. More than thirty persons attended the workshop, which took place from March 6th to March 7th at the *Fraunhofer Institut für Techno- und Wirtschaftsmathematik* in Kaiserslautern. The participants came from universities, research institutes and companies in Germany and from abroad.

The concept of bringing together two working groups and their corresponding members in a single event turned out to be successful. It combines specific research with ideas from other fields. Taking into account the discussion during the workshop, some problems form fields for joint work within the scope of interdisciplinary projects.

The topics discussed during the workshop reflect the latest results concerning theory, methodology and applications of Multicriteria Decision Making and Fuzzy Systems. The contents of the lectures can be found slightly changed in these proceedings.

This book will hopefully contribute to the advancement of Multicriteria Decision Making and Fuzzy Systems in theory, methods and applications. It should serve as a valuable reference for both scientists and practitioners who are looking for authoritative discussions of current results and for new topics of study.

Last but not least, the editors express their gratitude to Karl-Heinz Küfer and the *Fraunhofer Institut für Techno- und Wirtschaftsmathematik* in Kaiserslautern for the hospitality during the workshop. Further, we like to thank the *Gesellschaft für Operations Research (GOR)* for the financial support of the workshop.

Kaiserslautern, Frankfurt a. Main, Halle (Saale),
September 2006

Contents

Part I Theory

Coherent risk measures and vector optimization

Frank Heyde 3

Links between extended topologies and approximations of rough set theory

Milan Vlach 13

Part II Methods

ε -Constraint Method with Adaptive Parameter Control and an Application To Intensity-Modulated Radiotherapy

Gabriele Eichfelder 25

The PILS metaheuristic and its application to multi-objective machine scheduling

Martin Josef Geiger 43

Sensitivitätsanalysen in PROMETHEE

Jutta Geldermann, Martin Treitz, Valentin Bertsch, Otto Rentz 59

Graef-Younes Method with Backward Iteration

Johannes Jahn, Udo Rathje 75

Part III Applications

Bikriterielle Optimierung des Hochfrequenzfeldes bei der Magnetresonanzbildung	
<i>Eva Bijick, Dirk Diehl, Wolfgang Renz</i>	85
Particle Swarm Optimization in der stochastischen Lagerhaltung	
<i>Ole Brodersen, Andrea Höhn, Jörg Biethahn</i>	99
Fuzzy-Scheduling: Aspekte der Modellierung und zeitlichen Planung bei vagen Informationen	
<i>Wolfgang Anthony Eiden</i>	113
Applying Multiobjective Evolutionary Algorithms in Industrial Projects	
<i>Thomas Hanne</i>	125
Agenten in der Hafenlogistik	
<i>Jörg Biethahn, Leif H. Meier, Norbert Klettner</i>	143
A GIS-based Decision Support for Multicriteria Location-Routing Problems	
<i>Gabriel Neumann, Christiane Tammer, Ronny Weinkauff, Wolfgang Welz</i>	157
Visuelle Entwicklung von Anwendungen der Fuzzy-Logik und der künstlichen Intelligenz	
<i>Reiner North</i>	175
Das universitäre Seminarthemenzuordnungsproblem	
<i>Wolf Wenger, Martin Josef Geiger</i>	191
A Generalized Assignment Problem with Imprecise Restrictions	
<i>Kristin Winkler</i>	207
